

Luzerne Learns to Work

Program Outlook

In the 2025-2026 school year, the Luzerne Learns to Work program aims to:

- Engage **all 12 school districts in Luzerne County** in either teacher-facilitated or asynchronous student participation
- Provide access and awareness to **at least 6,000 students** across the County
- Give **any business and organization in Luzerne County** the ability provide student work-based learning experiences to grow their own sustainable workforce pipeline
- Award **scholarships** to students to support their next steps in education, totaling **\$10,000**

STREAMLINED CAREER EXPLORATION FOR LUZERNE COUNTY STUDENTS

Luzerne Learns to Work is an innovative educational program that provides Luzerne County high school students with a process and platform to explore career pathways, workforce development tools, and local industry career pipelines. Through the use of this program, students are empowered to explore potential career pathways through free access to EBSCOlearning and Metrix Learning, local workforce and career development tools, opportunities with local higher education institutions, work-based learning experiences with local companies, and scholarship opportunities for participating seniors. Awareness of these resources builds a pipeline of talent filtered into local industries, ensures that students get early exposure to our community, and produces more qualified talent retained to fill jobs in our most in-demand industries.

THE LUZERNE LEARNS TO WORK PARTNER ECOSYSTEM

We've collaborated with additional partners and agencies to integrate a variety of resources to help prepare students, educators, and parents/guardians for a full-fledged career exploration journey throughout all four years of high school. Presenting this solution as an ecosystem with educational tracks for students, parents and guardians, educators, and businesses will allow our region's most valuable resource providers the opportunity to address the topic of workforce development holistically, comprehensively, and collaboratively, building off the strength of each other's expertise and contributing them to a larger system to support more students with more opportunities.

TESTIMONIALS

STUDENTS

- "I like that this program actually gives insight and information on what to expect in my career choices in the future." - **LLW Student**
- "I thought that the information in the program was very useful and not something that you usually find in one place like that all at once." - **LLW Student**

TEACHERS

- "My students are more excited than I would have expected to get into this!" - **LLW Teacher**

SCHOLARSHIP RECIPIENTS

- "...the main goal is to become a college professor. I want to help give people the push to achieve greatness after putting in the work to have even gotten where they have in the first place. Working with such diligent people, just to stretch them further. I can spread the same love and care which was so readily given to me. That's the dream." - **LLW Scholarship Recipient**
